Dear _____!

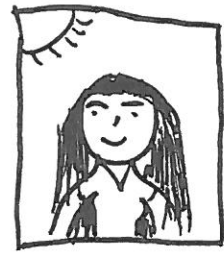

I am Anja Rešetič, I was born on 26th ~~th~~ of May ~~th~~ 2000 ~~born~~ in Slovenia. In September 2015, I started my first year in secondary school in Economics and trade school in Brežice. I am studying for a preschool teacher and I think that that's my dream job.

I have gained a lot of work experience in a past few years. ~~I~~ ^{have} had a practical work in kindergarten as a part of our education for 3 years and I also had an opportunity to work in kindergarten in Portugal for 2 weeks and I've seen a lot of differences ~~between~~ ^{education} between our systems.

I am a quick learner and I love to learn new languages. I am studying English for more than 10 years and it helps me to communicate with people around the world.

I would love to work in a kindergarten with kids because I know how to be creative and ~~how to~~ I learned how to motivate them to work ~~and~~ and listen. I also love to write, especially kids books, because they need to contain a lot of pictures so the kid can imagine the words that we are reading to them, ~~so~~ ~~because~~ because of my artistic skills I could also draw them by myself.

Name: Maria Trasian

Birth Date: 16/10/2001

Nationality: Armenian-Greek

Gender: Female

Contact information: email: mariatr312@gmail.com
phone number: 69914788488

I'm interested in travel photography mostly because I'm obsessed with taking pictures of beautiful places and of course I love travelling.

Resently, I spend so much time on visiting new places near my hometown Chania and taking photos of the nature, people and animals. Capturing moments made me realise the different aspects of reality and start seeing things in a different way.

My biggest dream to achieve is to travel around the world, meet new people, different cultures, learn new languages and create an overview of modern society. So, this job is so important opportunity for me.

It would be usefull to mention that I know some languages especially Greek, English, Armenian and a little bit of Russian.

Through my school years I participated in many group projects and I learned how to be cooperative and patient.

Also, I practise on my computer skills.

I want to become a teacher in the future.
